

Spring
Into
Success!

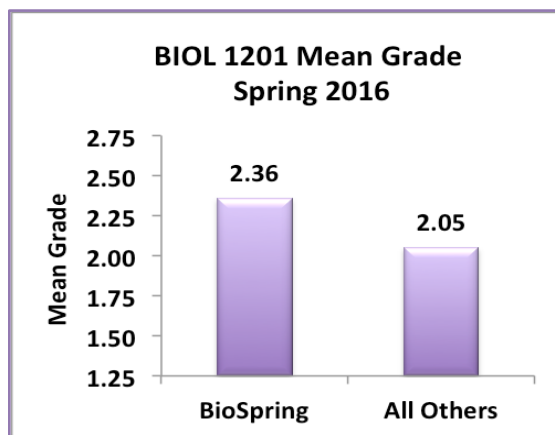

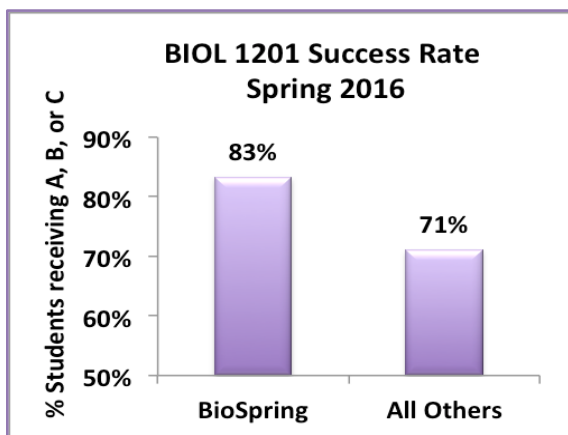

January 9-10,
2017

BioSpring is a program designed to give students the tools they need to succeed in the spring semester, not only in BIOL 1201 but in other classes as well. Participants will:

- Preview or review BIOL 1201 course material
- Review learning and test-taking strategies
- Learn note-taking, time-management and study skills

Many students are apprehensive about how challenging BIOL 1201 may be. **BioSpring** helps students get the jump-start they need for the new semester and the rest of their college career.

Participants in the program have consistently earned on average a higher grade and had higher success in BIOL 1201 compared to all other students taking the course during the spring semester.

The program lasts a day-and-a-half and will be held on January 9-10, 2017, the Monday and Tuesday before spring semester begins. The fee is \$50 and includes program materials and lunch on Monday.

For more information, visit the website <http://biospring.lsu.edu> or email Leigh Anne Howell at lhowell@lsu.edu. The deadline for applications is January 3, 2017.
